Dear

STAT

is pleased to submit for your consideration an unsolicited technical proposal entitled "Automatic Photographic Identification System," TP-191, dated January 1964.

STAT

The proposed program is of twelve months duration and will develop a high-resolution, normalizing photo-identification system. is proposing the utilization of a data processing technique, which produces a response invariant to image rotation and translation, and is minimally affected by other image variables, such as context and photographic density. This technique was developed by and has been successfully demonstrated on other military contracts.

STAT

will submit interim technical reports and a final technical report thirteen (13) months after contract award. A budgetary estimate for the proposed program is on a CPFF basis.
